

Cable Trays - Wire

A budget answer for workstation cable management. Made in 4 mm wire and plastic coated in Black, they are easy to mount, bend around corners if need be, and permanently contain the inevitable tangle of cables under an office desk. Checking, following or adding extra cables is made simple.

To keep data feeds away from power supply lines a 'Cable Segregator' can be used within the trays as shown opposite. This is a ribbed plastic wiring loom tube, made with a split to accept cables.

Minimalist by design, pure simplicity to use.
