

Cable Housing

SVAR Cable Housing is aluminum extruded with a 4 mm sidewall to our own exclusive design. An excellent way to incorporate unsightly cables into the furnishings. Perfect for situations where hiding cables proves difficult.

Screw or glue the channel in place and you have a pleasant and permanent way to add, remove and/or check cables at will. The plastic "dome" cover peels away to give full access and yet "zips" back into place readily.

Minimalist by design, pure simplicity to use.

RRP \$30.00 / metre
