

Small Screen Mounts

Â

Â 20EXT

Â Â Â Â Â Â Â Â Shelf bracket (pictured above)

Â is an optional extra

Â
20STD

The SVAR flat screen mounts are strong and exceptionally versatile.

A vertical [cable housing track](#)™ is fixed to the wall providing manual height adjustability and cable management.

Alternately a mounting plate can be used for the direct to wall option.Â

Modular construction provides several possible options to mount flat screens just about anywhere.Â

Tilt is set with an adjuster behind the vesa plate.Â For the extension version, just turn the screen to where you want it to be.

Â Â

Minimalist by design, pure simplicity to use.Â
