

Projector Mounts

Versatile and protective the SVAR Projector Mount 'Cage' is height and width adjustable to suit any projector upgrade. Constructed in steel with a powder coated finish it is exceptionally strong and stable.

To set up for an individual projector, the appropriate height and width is selected and locked by tightening the Allen screws with the Allen key provided. The projector is set in place after the Projector Mount has been fully assembled and installed. If a longer ceiling mount fitting will be needed please contact us for availability.

Minimalist by design, pure simplicity to use.
