

Vertical Holder

Before you get anything else,
get organised !

- Reclaim your desk or floor &
- increase your computers working life !

Free from dust, cables managed
and mounted where it should be!

Constructed in 2 & 3 mm steel the SVAR Vertical Computer Bracket is strong, stable and designed to secure any equipment vertically in the most effective position. Self tapping screws mount the Bracket under a desk top or onto a vertical surface.

To set equipment in place, the appropriate case height is locked by tightening two Allen screws with the Allen key provided. Width is set by clamping the case in place with the slide and lever lock arm. While the CPU case is positively clamped in place, release is via one lever. An exceptionally durable commercial unit in powdercoated steel.

Minimalist by design, pure simplicity to use.

RRP \$99.95

~~~~~

#### Ease of Access Options

There is a choice of Fixed or Pivoting or Slide/Turn options for ease of access.

#### Pivoting the Computer

A 'Pivot' mount can be fitted to the holder. It creates the ability to turn the processor to easily access cable sockets at the rear of the machine. Go to 'Slide and Pivot Options '.

#### Sliding & Turning the Computer

A 'Slide and Turn' mount is also available. It has a 500mm track enabling the processor to move sideways out of the way,

yet can slide back to centre and turn for effortless access to the cable socket area. Go to 'Slide and Pivot Options '.
